WORLDWIDE NONVIOLENT RESISTANCE TO ELITE CONTROL _ THE GREAT RESET

Why Keep Small Businesses Open in Lockdowns? Why Buy from Small Businesses? Why Resist Contact Tracing, Including Through the Use of QR Codes?

The current lockdowns are designed to destroy small and family owned businesses so that we all become fully dependent on big business to meet all of our needs, and lose opportunities for running our own independent economies. This is just one way in which the Global Elite is consolidating wealth in fewer hands while driving many of us to an impoverished, and dependent, state.

The destruction of small and family businesses, which offer personal service, can only be carried out if we shop, in person or online, at the large, impersonal corporate chainstores. These large stores have been eating the heart out of our communities for decades and if we do not support small, local and family businesses now, they will not exist much longer, as is intended.

The surveillance of healthy people, through 'contact tracing', is (or was) illegal according to many legal codes around the world, precisely because it is a clear infringement on people's human rights and indicates an interest in increasingly totalitarian control by those who wish to use it. When people are telling you that in fearful situations, you have to give up all of your freedoms and independence to be 'safe', it makes sense to question the motives of those giving advice and orders.

Comprehensive surveillance, and the control of our behaviour it will make possible, can only be implemented if we all go along with it.

So boycott large chainstores, including supermarkets, and online 'monsters' such as Amazon, and encourage local businesses, such as grocers, cafés, restaurants and hairdressers, to not insist that we participate in surveillance. If you are a small business owner, support your local customers to resist surveillance and control by not requiring personal data or registering QR codes, and by accepting cash. Organise with others to stay open in lockdowns.
